GHAIDA YAHYA ALHADI

Information Technology | Full-stack Development | UI/UX

Ghadi@stu.kau.edu.sa | github.com/ghaidaAlhady | linkedin.com/in/ghaida-alhadi-722b96362

PROFILE

Information Technology student at King Abdulaziz University (expected graduation June 2027) with practical experience delivering full-stack web applications, integrating bounded AI assistance, and designing user-centered digital experiences.

EDUCATION

Bachelor's Degree in Information Technology | King Abdulaziz University

2022 – June 2027 (Expected)

EXPERIENCE

Summer Intern — Artificial Intelligence Tools Track

Deanship of E-Learning and Distance Education, King Abdulaziz University | Late June – August 2026

- Built the **Smart Guide for Children's Language Delay**, an Arabic-first non-diagnostic platform with assessments, weekly home plans, progress tracking and reports.
- Connected **React / TypeScript** interfaces to **Python / FastAPI** services, database models, APIs and structured knowledge-base content.
- Integrated controlled **Google Gemini** explanations while keeping scoring and key assessment decisions grounded in deterministic backend rules.
- Tested complete user journeys, resolved integration issues, documented progress and prepared the final presentation; also produced **three digital-content videos**.

TECHNICAL SKILLS

Programming & Web: Python, Java, HTML, CSS, React, TypeScript, FastAPI, Object-Oriented Programming

Systems & Data: PostgreSQL, SQLAlchemy, REST APIs, Git, GitHub, UML, Requirements Analysis, Testing

Design & Tools: Figma, UI/UX Design, Canva, Blender, Cisco Packet Tracer, Documentation

SELECTED PROJECTS

Smart Guide for Children's Language Delay — Arabic-first full-stack web application supporting structured early-language assessments, personalized weekly activities and follow-up, with controlled AI wording. (React, TypeScript, FastAPI, Python)

Weam | Graduation Project — Arabic-first care-coordination platform in development for children with special needs, linking authorized reports, goals and care-team follow-ups.

HR Leave Management System — Completed team Java project covering employee records, leave requests, balances, contracts, reporting and GUI workflows.

StyleSculpt — Interactive Figma prototype for a clothing-shopping mobile app, emphasizing intuitive discovery and navigation.

AES Encryption in Java — Java Swing project demonstrating AES encryption and decryption in ECB and CBC modes with Base64 output.

Flying House — Creative 3D flying-house model and rendering produced with Blender.

RECOGNITION & CERTIFICATIONS

- AI Hackathon for Persons with Disabilities (ICDR 2026) — Participation.
- FCIT, King Abdulaziz University — Recognition for Cybersecurity Club contributions.
- Workshops: Adaptive Learning & Inclusive EdTech, Rehabilitation Robotics, Universal Design for AI & Robotics (2026).
- NotebookLM Tool Explainer — Deanship of E-Learning and Distance Education (2026).
- Google UX Design — Foundations of User Experience Design.

LEADERSHIP & COMMUNITY

- **Cybersecurity Club, Media Committee:** Supported creative design and cybersecurity-awareness activities.
- **IEEE, Innovation & Creativity Committee:** Contributed to monthly reports and idea development.

Languages: Arabic and English
